Introduction

This document is intended to provide a guide to the purpose and parameters of the Turing Scheme for applicants and Grant Recipients.

The Turing Scheme is a competitive grant funding scheme. It provides grants to successful organisations to fund individuals undertaking education and training in the UK, to go on study or work placements across the world. It affords the opportunity for UK organisations to offer life-changing experiences abroad for their pupils, students, and learners.

Funding is open to UK and British Overseas Territories organisations from across the education and training sector, including schools, universities and higher education providers, further education colleges and providers of vocational education and training.

This funding allows organisations to provide students, learners, and pupils with the chance to develop new skills, gain vital international experience and boost their employability. They can also develop a wide range of soft skills, language skills and a better understanding of other cultures. Organisations can build relationships with international peers and gain fresh ideas.

The Turing Scheme contributes to the UK Government's commitment to a Global Britain, by helping organisations enhance their existing international ties and forge new relationships around the world.

The Delivery Partner for the Turing Scheme is Capita, working on behalf of the Department for Education.

Objectives

The Turing Scheme will provide funding for UK projects offering education and training opportunities with a global reach. Projects must address four main objectives:

Global Britain

In line with the UK government's vision of a Global Britain, Turing Scheme projects support high quality placements, enhance existing partnerships, and encourage the forging of new relationships across the world.

Levelling up

Turing Scheme projects will support social mobility and widen participation across the UK. They should help and promote equal access and opportunities to all pupils, students, and learners regardless of their background.

Developing key skills

These projects will offer unique, career-building opportunities. They will give participants the hard and soft skills sought by employers and bridge the gap between education and work.

Value for UK taxpayers

These projects will optimise social value in terms of potential costs, benefits, and risks.
